

When people ask what CMI does, I tell them we control the uncontrollable. Moving cargo through the world's busiest ports is challenging—circumstances can change by the hour. And though some situations are beyond our control, we are a company made up of men and women who think on their feet.

At CMI, our approach can best be described as “whatever it takes”. Being nimble yet focused has earned us an untarnished reputation for no-excuses excellence. Each one of our bright professionals offers a great mix: part independent thinker, part team player. Their enduring dedication and sharp expertise combine to conquer any obstacle that threatens the supply chain.

In the decades since CMI began, the world has undergone startling change. In every industry worldwide, technology has upped the bar, dictating a demanding pace. We have made a commitment to continue setting the standard for our industry—with streamlined operations, groundbreaking tracking software and a near-reverence for enhanced communication.

CMI's creative leadership has resulted in employees who are empowered and effective. And that, of course, translates to customer service that's second to none. We look forward to the opportunity to prove it.

Fast, Safe and Smart

WELCOME TO CALIFORNIA MULTIMODAL INCORPORATED

When CMI's trucks first took to the roads in 1984, they paved the way for what would become the largest landbridge network on the West Coast. Today, we provide one-stop, big-picture logistics — full-service supply chain management that encompasses transportation, warehousing and distribution of both international and domestic cargo.

Our solid port alliances, interchange agreements and longstanding industry relationships form the foundation for CMI's comprehensive suite of drayage services. The network we have carved offers every client unparalleled efficiency, cost-conscious options and time-sensitive delivery. Drawing on diverse backgrounds in all facets of the transportation field, our team consistently creates solutions to ever-changing parameters of coordinated transportation.

CMI operations reach from Washington State to Mexico. Our dispatchers communicate seamlessly with marine terminals minute by minute, ready to move your freight when and where it needs to go with maximized capacity and range.

You enjoy peace of mind in knowing you have the industry's most experienced pros treating your shipment as if it were their own.

Visibility Takes Vision

Information turns the world and giving our clients access to it is one of CMI's strengths. Evidence is our proprietary software, the CMI Container Tracking System, quite simply the industry's most sophisticated — flexible, EDI compatible and updated by the second.

Continuously refined by the demands of the real world, this web-based program offers up to 29 ways to access the status of your shipment — by container, SKU number, vessel, purchase order or estimated time of arrival, to name a few. Facts are offered in real time, and in unprecedented detail. Other software might tell you that cargo is on hold — CMI tells you why.

However you need to access data is how CMI offers it, ready for you to download, merge and sort. We have everything it takes to customize our programs to your exact specifications.

The Certainty of CMI

As a reliable, fully accountable supply chain operator, CMI adheres to stringent guidelines for safety and security. We take great pride in these impeccable credentials and the confidence they instill in our valued clients:

- Uniform Intermodal Interchange Association
- C-TPAT and FAST Participants
- Hazardous Material Transportation License
- Broker's Authority
- California Motor Carrier Permit
- Customs Bond
- Customs-Bonded Warehouses
- Satisfactory CHP-BIT and Federal Ratings
- 48-State Common Carrier Registration

**Managing the Supply Chain
with Relentless Drive**

Pulling Back To Scope The Big Picture, Moving In To Focus On The Details

Doing everything we can to deliver optimal efficiency to our clients is CMI's unwavering goal. While control of your cargo is centralized, day-to-day operations are definitely not:

- Our vast container yard facilities allow us to manage movement of both inbound and outbound containers.
- Not all warehouse operations meet the stringent guidelines in place to be customs bonded, as CMI's U.S. facilities are. Operating secure and around the clock, they offer you flexibility for storage or rapid mobilization.
- Highly refined handling procedures and transloading capabilities insure your cost-effective operation and a supply chain that is unimpeded.
- CMI's location within the overweight corridor, coupled with our specialized equipment, allows us to move cargo weighing up to 90,000 pounds.

In an energy-charged environment, commanding the smooth movement of freight requires a perfect balance of time restraints, space requirements and cost considerations. The experienced logistics experts of CMI meet this challenge with calm precision.

From Tacoma to Tijuana, CMI Keeps You Moving

The arteries for global trade are still the waterways, and the neighboring ports of Los Angeles and Long Beach are the busiest in the nation. CMI is proud to operate the largest landbridge network operating from these ports, the heart of our expansive transportation web. It encompasses marine terminals, rail hubs, distribution centers and assembly plants all along the West Coast and into Mexico.

CMI Services — Whatever It Takes For Whatever You Need

Impeccable logistics require specialized knowledge in trucking and warehousing. CMI delivers excellence in both.

Trucking

Pair your cargo with the most experienced drivers in the industry and our own fleet of 53-ft. air-ride trailers. Then track it in real time as it moves from the harbors over the highways, near and far, day and night, through CMI's closely managed network. Our superior software certifies accurate time keeping records, flags violations, monitors equipment and demands strict compliance.

- **Mini Landbridge Services**, in place from Seattle to San Diego, are the foundation of CMI's trucking capabilities. The hub of our extensive landbridge network includes the ports of Los Angeles and Long Beach, the busiest in the nation, where the vast majority of cargo moving through the West Coast arrives.
- **Store/Door Services** help you streamline your operations, saving time, eliminating unnecessary steps and delivering unfragmented peace of mind, from rail or harbor right to your door. Ever-cost conscious, CMI returns containers at nothing less than top speed.
- **Interstate Over-the-Road Transport** operates under the strictest standards for quality control and safety. After being transloaded at a secure facility, your shipment heads out with not a minute wasted. Behind the wheel is an experienced professional who's safe, insured and tested for drug and alcohol abuse. Our fleet is well maintained, inspected often and ready for the long haul.

Warehousing

CMI maintains extensive warehouses to insure that you cut costs and lead-time. Many operate below the border, where CMI de Mexico, a strategic partner to CMI, works closely with local assembly facilities, called Maquiladoras. These secure warehouses, located in all the right places, drastically reduce your exposure. They are integral to CMI's leadership position, allowing us to offer smart, customized programs for your international cargo.

From marine terminals to rail yards, from secure warehouses to the open road, CMI's start-to-finish services are responsive, flexible and time sensitive.

CMI de Mexico, a strategic partner to CMI, is here to help you maximize the advantages offered by the country's Maquiladora and PITEX Communities. Count on our experience for uninterrupted logistics, rapid mobilization and full-service fulfillment for your international operations.

CMI de Mexico...

It takes experience, teamwork and savvy to coordinate smooth transitions between the United States and Mexico — and between international and domestic carriers. For CMI, it's all in a day's work. With secure facilities on both sides of the border, we're equipped and capable of reducing your exposure and increasing your productivity.

A thorough understanding of the complexities of international border crossings is demonstrated daily by CMI's seasoned Customer Service technicians. The depth of their knowledge is what it takes to facilitate proper and timely customs documentation. From point of entry to final destination, your cargo is managed with unrelenting diligence.

CMI's International Cross Border Services are carried out by a fleet that's capable of making hundreds of border crossings every day. All our operations align with initiatives under Customs-Trade Partners Against Terrorism (C-TPAT) and Free and Secure Trade (FAST). An extensive communication network keeps us — and you — informed every minute of every mile.

The CMI philosophy is flexible, customer-friendly and technology-driven. Customizing our services to fit your needs is what elevates us from a simple provider to a strategic partner.

The Undisputed Leader in Seamless International Services

In three highly secure
locations – Tijuana and
Mexicali in Baja California
and Ciudad Juárez in
Chihuahua – CMI de Mexico
offers warehousing capabilities
that are second to none.

What's In Store For Your Supply Chain?

Nearly a million square feet of space – clean, secure and well managed – can be factored into your supply chain when you partner with CMI de Mexico. Armed with state-of-the-art security, these facilities open the door for less risk, reduced costs and shorter production time.

The flexibility of our warehousing services reflects CMI's whatever-you-need attitude. What we provide includes, but isn't limited to, these key services:

- **Vendor-Managed Inventory** Enjoy the shortest possible lead-time and the highest flexibility for your south-of-the border operations. CMI de Mexico is the most experienced warehousing partner you'll find, offering reliable, one-step-ahead support services and the highest level of inventory management.
- **Just-in-Time Delivery** Work smart and be responsive, without carrying the weight of inventory. CMI stands ready to supply whatever you need – from raw materials to component parts – precisely when production calls for them. Shorter response time means lower costs.
- **Contract Warehousing** Place CMI's staff, software and skills inside your own facilities, operating your equipment, and realize peak efficiency. We will also secure, deliver and manage inventory to support your production. Your benefit is lower costs, not just in money, but time.
- **Intra-Plant Staffing** As staffing needs rise and fall, CMI responds. We'll send precisely the number of people you need – hand selected for their skill and reliability – where and when you need them. You enjoy the benefits of a streamlined operation, with no liability and no worries.
- **Pick and Pack Services** Take control of less-than-pallet-load freight that needs repackaging before distribution. CMI's centralized assembly, storage and shipping capabilities reflect the specialized expertise this detailed service demands. We promise accuracy, high volume and speed.

CMI's Potential-Packed Warehousing Services

Over and Above and Nothing Less

From dedicated drivers to intuitive field dispatchers, from friendly receptionists to decision makers, every member of the CMI team shares in a company spirit that strives for excellence.

We believe that empowering highly trained employees sets a tone for synergy and dedication to a job well done.

As a CMI client, you will enjoy a successful working relationship with a single point person who is accountable to you, but supported by dozens of seasoned professionals. Adaptability is an inherent part of our business, so we're well equipped to accommodate your unique situation with everything we've got.
